

Addition to the Global Business Management Option

Effective with the Fall 2009 semester, an Entrepreneurship Track is being added to the Global Business Management Option. Students in this option may now choose to follow either the previously existing Marketing Track or the new Entrepreneurship Track.

Entrepreneurship Track

(55 units)

The Entrepreneurship track is specifically designed to help students incubate a business idea, learn the different components essential to starting and managing a start-up business and evaluate closely the viability of their idea. The program is designed to help students develop their ideas into a well-conceived business plan that can lead to a start-up business.

In order to accomplish these objectives, students will move through a sequence of courses that build upon one another. Students begin by learning about the challenges of entrepreneurship, and by completing a first-level analysis of the viability of their business idea. Students then take courses in new venture marketing, management, and financing to increase their understanding and skills to further develop their business idea and determine its potential. Students will also benefit significantly from the experiences of entrepreneurs in the community, and learn from their successes and failures. The track concludes with the development of a business plan in the capstone course.

New Venture Marketing

In a new venture, marketing activities are critical. The process of identifying potential consumers, researching consumers' needs, creating products or services they want, developing an interactive communication process, and creating a process for getting those products to consumers are essential to success but must be performed with entrepreneurial constraints. With a limited staff and budget, creative and innovative techniques are used to achieve the same results as a specialized staff and a large budget in well established companies. *Enrollment restricted to students who have completed all lower-division pre-business core (major status in Business Administration – i.e. attained business status). Prerequisites: ENTR 320 with a grade of C (2.0) or better.*

ENTR 421 (2)

New Venture Management

Explores the management challenges inherent in starting a new venture. The course subjects will include a survey review of the following: human resources (actions of the founder, compensation, selection), physical resource acquisition (real estate space and equipment leasing), materials sourcing, regulatory processes (licenses, certifications), negotiation strategies, and business formation. The course is designed around a hybrid instruction model including in-class discussion and outside-of-class experiential activities, field research, and WebCT discussions. In-class sessions will include rich discussion of short case studies and reading materials. The outside-of-class activities will be extensive and focused on the practical management challenges of entrepreneurship. WebCT will be used as the meeting place and reporting area for the outside of class activities. *Enrollment restricted to students who have completed all lower-division pre-business core (major status in Business Administration – i.e. attained business status). Prerequisites: ENTR 320 with a grade of C (2.0) or better.*
