

Teaching Tips & Classroom Ideas

Approach
lessons with
“What if?”

Teaching is Solitary...

- Ask questions!
- Encourage collaboration!
- Experiment!

One important
gift you can
give to your
students:

be
Consistent
and
Predictable

Post an “agenda” in every
class that includes

- 1) Opener—what do you want to do to start your class session today?
- 2) Objectives for that class session—what do you expect your students to learn today?

Create a shared classroom hash tag on Twitter and have students tweet thoughts, questions, or most valuable points. They will also respond to each other’s questions and comments providing you with instant feedback about how your students are doing with the content!
